Journal of Neuroscience Methods, 24 (1988) 289–290
Elsevier

Author Index Volume 24

Adams, F., see Becker, J.B. (24) 259
Arendt-Nielsen, L. and Bjerring, P.
Selective averaging of argon laser induced pre-pain and pain related cortical responses (24) 117

Bäckström, L.O., see Edin, B.B. (24) 137
Bäckström, P.A., see Edin, B.B. (24) 137
Barnett, T.G., see Millar, J. (24) 81
Becker, J.B., Adams, F. and Robinson, T.E.
Intraventricular microdialysis: a new method for determining monoamine metabolite concentrations in the cerebrospinal fluid of freely moving rats (24) 259
Bjerring, P., see Arendt-Nielsen, L. (24) 117
Blomqvist, A., see Ericson, H. (24) 225
Brooke, J.D., McIlroy, W.E., Zelin, S. and Hoare, J.
A technique for electrically induced perturbation of rhythmic leg movement (24) 253
Bucsics, A., Sutter, D., Jancsó, G. and Lembeck, F.
Quantitative assay of capsaicin-sensitive thiamine monophosphatase and β-glycerophosphatase activity in rodent spinal cord (24) 155

Carlsson, K., see Wallén, P. (24) 91
Carson, G. and Hicks, T.P.
A fetoscopic method for enucleation in developmental studies of the visual system (24) 101
Choca, J.I., Clark, F.M., Green, R.D. and Proudfit, H.K.
A low-priced computer-assisted densitometer and analysis software for quantitative autoradiography (24) 145
Clark, F.M., see Choca, J.I. (24) 145
Cornwall, J. and Phillipson, O.T.
Quantitative analysis of axonal branching using the retrograde transport of fluorescent latex microspheres (24) 1

DiScenna, P.G., see Vaknin, G. (24) 131
Drapeau, P.
Long-term storage of functional, isolated nerve endings by slow freezing and rapid thawing (24) 111
Dubach, M.D., see Schmidt, R.H. (24) 243
Duchamp, A., see Vigouroux, M. (24) 57
Duysens, J. and Gybels, J.
The automated measurement of hindlimb flexor reflex of the rat as a substitute for the tail-flick assay (24) 73

Ebmeyer, U., see Markefski, M. (24) 271
Edin, B.B., Bäckström, P.A. and Bäckström, L.O.
Single unit retrieval in microneurography: a microprocessor-based device controlled by an operator (24) 137
Ericson, H. and Blomqvist, A.
Tracing of neuronal connections with cholera toxin subunit B: light and electron microscopic immunohistochemistry using monoclonal antibodies (24) 225

Freed, C.R., see Sabol, K.E. (24) 165

Glasbey, C.A. and Martin, R.J.
The distribution of numbers of open channels in multichannel patches (24) 283
Green, R.D., see Choca, J.I. (24) 145
Grillner, S., see Wallén, P. (24) 91
Gybels, J., see Duysens, J. (24) 73

Herness, M.S.
Gustatory stimulating technique for glossopharyngeal neurophysiological recordings (24) 237
Hicks, T.P., see Carson, G. (24) 101
Hoare, J., see Brooke, J.D. (24) 253

Jancsó, G., see Bucsics, A. (24) 155
Jennings, P.J. and Poizner, H.
Computergraphic modeling and analysis II: three-dimensional reconstruction and interactive analysis (24) 45
Jones, S.C. and Lu, D.
The evaluation of quantitative autoradiogram processing systems for cerebrovascular research (24) 11

Kumakura, K., Sato, A. and Suzuki, H.
Direct recording of total catecholamine secretion from the adrenal gland in response to splanchnic nerve stimulation in rats (24) 39

Lembeck, F., see Bucsics, A. (24) 155
Liljeborg, A., see Wallén, P. (24) 91
Lowdon, I.M.R., Seaber, A.V. and Urbaniak, J.R.
An improved method of recording rat tracks for measurement of the sciatic functional index of de Medinaceli (24) 279
Lu, D., see Jones, S.C. (24) 11

Markefski, M., Wolf, G. and Ebmeyer, U.
Fluoroscopic determination of NAD(P)H/NAD(P)$^+$ ratios in brain slices under perifusion conditions (24) 271
Martin, R.J., see Glasbey, C.A. (24) 283
McIlroy, W.E., see Brooke, J.D. (24) 253
Millar, J. and Barnett, T.G.
Isolated constant-current stimulation circuits for neuroscience applications (24) 81

0165-0270/88/$03.50 © 1988 Elsevier Science Publishers B.V. (Biomedical Division)

Morris, R.
A simple modular tissue bath developed for 'in vitro' studies of the isolated spinal cord (24) 107

Osborn, C.E. and Poppele, R.E.
A method for determining the primary effect of a stimulus in tonically firing neurons using spike train analysis (24) 125

Phillipson, O.T., see Cornwall, J. (24) 1
Poizner, H., see Jennings, P.J. (24) 45
Poppele, R.E., see Osborn, C.E. (24) 125
Proudfit, H.K., see Choca, J.I. (24) 145

Robinson, T.E., see Becker, J.B. (24) 259
Rodnight, R., Zamani, R. and Tweedale, A.
An investigation of experimental conditions for studying protein phosphorylation in micro-slices of rat brain by two-dimensional electrophoresis (24) 27

Sabol, K.E. and Freed, C.R.
Brain acetaminophen measurement by in vivo dialysis, in vivo electrochemistry and tissue assay: a study of the dialysis technique in the rat (24) 165
Sato, A., see Kumakura, K. (24) 39
Schmidt, R.H. and Dubach, M.D.
A computer-based rotation and activity monitor for non-human primates and other animals (24) 243
Seaber, A.V., see Lowdon, I.M.R. (24) 279
Sutter, D., see Bucsics, A. (24) 155
Suzuki, H., see Kumakura, K. (24) 39

Teyler, T.J., see Vaknin, G. (24) 131
Tweedale, A., see Rodnight, R. (24) 27

Urbaniak, J.R., see Lowdon, I.M.R. (24) 279

Vaknin, G., DiScenna, P.G. and Teyler, T.J.
A method for calculating current source density (CSD) analysis without resorting to recording sites outside the sampling volume (24) 131
Vigouroux, M., Viret, P. and Duchamp, A.
A wide concentration range olfactometer for delivery of short reproducible odor pulses (24) 57
Viret, P., see Vigouroux, M. (24) 57

Wallén, P., Carlsson, K., Liljeborg, A. and Grillner, S.
Three-dimensional reconstruction of neurons in the lamprey spinal cord in whole-mount, using a confocal laser scanning microscope (24) 91
Whishaw, I.Q.
Food wrenching and dodging: use of action patterns for the analysis of sensorimotor and social behavior in the rat (24) 169
Wolf, G., see Markefski, M. (24) 271

Yamada, M. and Yasui, S.
Measurement of DC and AC spectral sensitivities of retinal horizontal cells by "voltage clamp by light" (24) 65
Yasui, S., see Yamada, M. (24) 65

Zamani, R., see Rodnight, R. (24) 27
Zelin, S., see Brooke, J.D. (24) 253
